
CHURN IS DEAD

The Continuous Success Architecture Audit

Replace quarterly theater with continuous value delivery

Evaluate which QBR components can be automated, self-service, triggered, or require human strategic input. Use this audit to systematically replace scheduled success theater with continuous value delivery.

Scoring: Rate each item 1-5. 1 = quarterly meetings only, 5 = fully automated/continuous.

Version: 1.0 -- May 2026

SECTION 1

Always-On Intelligence

Customers need insights when making decisions, not when convenient for your calendar. Continuous intelligence eliminates the delay between data and action.

Intelligence Type	Continuous Delivery	Quarterly Theater
Usage Trends	Real-time dashboards with automated alerts for anomalies	Monthly charts in PowerPoint slides
Health Metrics	Contextual health scores updated continuously within customer workflow	Quarterly health score presentations
ROI Calculations	Dynamic ROI tracking integrated into customer's business systems	Static ROI summaries delivered quarterly
Expansion Signals	Automated recommendations triggered by usage patterns	Manual upsell discussions in scheduled meetings
Risk Indicators	Immediate alerts when behaviors indicate churn risk	Quarterly risk reviews after damage is done

Score This Section

Criteria	Score
Customers receive automated insights exactly when needed	1-5
Intelligence arrives contextually within customer workflow	1-5
No delay between insight availability and customer access	1-5

Your Score: ____ / 5

SECTION 2

Triggered Interventions

Human engagement should respond to real customer signals, not calendar reminders. Triggered interventions ensure every interaction has clear value and timing.

Intervention Type	Signal-Based Engagement	Calendar-Based Meetings
Risk Mitigation	Immediate outreach when usage drops or support tickets spike	Quarterly check-ins regardless of customer health
Expansion Conversations	Strategic discussions triggered by adoption milestones	Scheduled upsell presentations based on renewal dates
Implementation Support	Expert help activated by integration roadblocks	Regular implementation reviews whether needed or not
Executive Alignment	Leadership engagement prompted by strategic initiatives	Quarterly executive briefings regardless of activity
Renewal Preparation	Contract discussions initiated by usage and satisfaction signals	Renewal meetings scheduled 90 days before expiration

Score This Section

Criteria	Score
Human engagement responds to real customer signals	1-5
Every interaction has clear, timely value proposition	1-5
Customers understand why outreach is happening now	1-5

Your Score: ____ / 5

SECTION 3

Self-Service Strategy

Customers should access strategic insights on their schedule and business rhythm, not when convenient for your meeting calendar.

Strategic Resource	On-Demand Access	Scheduled Delivery
Business Reviews	Interactive dashboards customers access when making decisions	Quarterly presentations regardless of decision timing
Benchmarking Data	Real-time industry comparisons within customer's analytics	Annual benchmark reports delivered on your schedule
Best Practices	Contextual recommendations surfaced during relevant workflows	Generic best practice presentations in scheduled meetings
Strategic Planning	Planning templates and tools available when customers need them	Quarterly planning sessions regardless of customer planning cycles
Success Metrics	Self-service success tracking aligned to customer KPIs	Success metrics presentations using your frameworks

Score This Section

Criteria	Score
Customers can access strategic insights 24/7	1-5
Resources align to customer business rhythms, not your calendar	1-5
No coordination overhead required for strategic access	1-5

Your Score: ____ / 5

SECTION 4

Exception-Based Engagement

Humans should focus exclusively on scenarios where automation can't solve the problem. This maximizes the value and impact of human interactions.

Engagement Scenario	Human-Required Complexity	Automatable Routine
Strategic Planning	Complex multi-stakeholder alignment requiring negotiation skills	Standard implementation roadmaps and timeline tracking
Technical Integration	Unique architecture requiring custom solutions	Standard API integrations and common use cases
Executive Relationships	High-stakes relationship management and political navigation	Regular status updates and progress reporting
Crisis Management	Complex problem-solving requiring creative solutions	Standard troubleshooting and known issue resolution
Contract Negotiations	Custom terms requiring business judgment	Standard renewals and expansion pricing

Score This Section

Criteria	Score
Human engagement focuses only on genuinely complex scenarios	1-5
Customers understand clear human advantage in these interactions	1-5
Routine tasks are fully automated or self-service	1-5

Your Score: ____ / 5

CHURN IS DEAD

Your Scorecard

Dimension	Your Score	Max
1. Always-On Intelligence	_____	5
2. Triggered Interventions	_____	5
3. Self-Service Strategy	_____	5
4. Exception-Based Engagement	_____	5
TOTAL	_____	20

Total Score	Assessment	What It Means
16-20	Uncuttable	Embedded, measurable, strategically irreplaceable.
12-15	Defensible	Solid but gaps remain. Focus on lowest dimension.
8-11	Vulnerable	Real risk ahead. Treat as urgent.
4-7	Critical	Cannot survive scrutiny. Major changes needed.

What to do next: Take your lowest-scoring section and build a 30-day action plan. One at a time. Then share this with leadership -- not to ask permission, but to show you know where the gaps are.

The future of customer success isn't better meetings. It's making meetings unnecessary by delivering continuous value through intelligent systems.
